Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The examiner is not clear as to what claims should be examined. Amendment filed 7/25/06 canceled claims 1-23, amendment filed 5/25/06 list claims 1-48 as (withdrawn).

Claim Objections

Claims 49-101 are objected to because of the following informalities: Numerous claims have multiple capitilaiztion of leters therein. Only the first letter of the claim should be be capitalized. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 49-101 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO documtn '820 in view of Lindblom et al. '926 or Bergenwall '351..

Epo document disclose a multi-position reclining bed comprising (see disclosure) a support including plurality of sections including a back section, a buttocks section, thigh section, and a calves section, the support configured to carry a mattress thereon; a track coupled to the support; a linear actuator coupled to the support; wherein the back section is coupled to the track section and configured to move an end portion thereof vertically when the linear actuator is activated. However, it lacks thigh section and calves section configured to form a single acting rigid coplanar leg section that reclines

pivotally below a horizontal plane of the buttocks section in a downward direction pivotally about an adjoining edge with the buttocks section. Lindblom et al. and Bergenwall both teach thigh section and calves section configured to form a single acting rigid coplanar leg section that reclines pivotally below a horizontal plane of the buttocks section in a downward direction pivotally about an adjoining edge with the buttocks section (see disclosure). It would have been considered obvious to modify Epo to include teachings of either Lindblom et al. or Bergenwall to aid a person from exiting the bed.

Response to Arguments

Applicant's arguments with respect to claim 49 have been considered but are moot in view of the new ground(s) of rejection.
